

SmartHours[®] ecobee Guide

Comfort Settings:

Main Menu → Comfort Settings

Temperature preference for each setting:

- **Home:** your preferred temperature when you wake up.
- **Away:** set 2–4 degrees higher than your Home setting for peak hours (weekdays, 2 p.m. – 7 p.m.).
- **Sleep:** your preferred cooler temperature after peak hours.

ecobee Essential: Due to the model's default settings, the thermostat will automatically begin pre-cooling at 11 a.m. The temperature will drop 2 degrees lower than the set temperature at that time.

Comfort Settings

ecobee recommends these temperature presets to help you save energy.

	Home	 68	 76
	Away	 64	 82
	Sleep	 64	 80

Next →

Recommended Comfort Settings can vary from home to home. Choose settings that work best for your home, comfort and routine.

We recommend pre-cooling your home before peak hours for added comfort. You can opt out of the default pre-cool time and set your own.

To opt-out of pre-cooling:

- Main Menu → Preferences → Cooling Smart Recovery → Disabled

Schedule:

Main Menu → Schedule

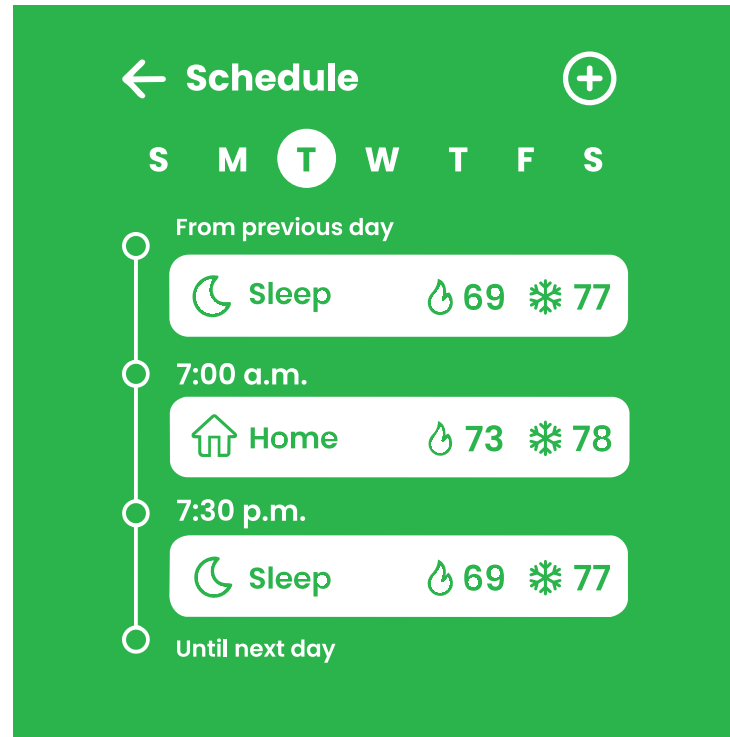

Note: The ecobee Essential has two default Comfort Settings on the schedule. Add a third Comfort Setting to the schedule to align with SmartHours peak hours.

Adjust the time for current schedule:

1. **Home:** your preferred temperature when you wake up.
2. **Sleep:** your preferred cooler temperature after peak hours, preferably 7 p.m.

Additional Comfort Settings:

- Plus sign (top right) → Away → Set Start Time for 2 p.m. – Set Stop Time for 7 p.m. → Save.
- To add additional time zones, your ecobee must be connected to Wi-Fi. Use the ecobee app or log in at ecobee.com to create them.
- **Final step:** select “Copy” on the bottom and check M-F.

Questions?

Contact the SmartHours Support Center at SmartHours@oge.com or 888-209-2948 for assistance.

Examples include:

1. Creating Comfort Settings.
2. Assistance with setting or adjusting schedules.
3. Information about peak temperature adjustments and pre-cooling.
